

Choose *Earth Bamboo*[®] superior
quality solid bamboo flooring

Because there's only one *Earth!*

Care & Maintenance Guidelines

Follow the guidelines below to keep your new bamboo floor looking as good as the day it was installed.

- Vacuum or sweep floor regularly.
- Remove spills promptly.
- Place mats at exterior/interior doors to trap sand/grit from incoming traffic.
- Use rugs on high traffic areas.
- Fix protector pads to the base of all furnishings.
- When moving heavy furniture or appliances, always pick it up rather than sliding it across the floor.
- Keep pet's claws trimmed to avoid minor scratches.
- Clean with a slightly damp mop with warm water and methylated spirits (two capfuls in a bucket of water).
- To remove stubborn marks, use undiluted methylated spirits directly onto a cloth or sponge.
- In wet weather, carefully monitor doors and windows for water leakage.
- Remove debris from expansion voids.
- Protect the floor from direct sunlight with curtains or blinds.
- Move rugs regularly to ensure colour consistency throughout your floor.

WHAT NOT TO DO

- Do not roll or slide heavy furniture or appliances across the flooring.
- Do not wet mop or steam mop the floor. Too much water can cause the floor to swell or cup.
- Do not let sand, dirt or grit build up.
- Do not walk on the floor in high heel shoes.
- Do not use waxes, oil soap, or other household cleaners on the floor. Use of these products can dull the floor's finish.
- Do not clean the floor with scrubbing machinery or power scrubbers.
